- One-of-a-kind 12-month course
- Industry-vetted, structured curriculum
- LIVE Live classroom learning
- 1:1 Mentorship with industry experts
- Doubt-solving by teaching assistants
- 50+ Real-world case studies
- Placement assistance
- 900+ Partner companies

Adding the Scaler Touch to DevOps

Every feature is designed with one goal, your success.
From curriculum to mentors, projects, placements every step is carefully considered with nothing left to chance.
This is what makes Scaler different and gives you an edge.

24×7 AI Companion

Always-on learning buddy that uses contextual help & dialogue based solutioning, blending AI speed with mentor expertise.

Unlimited AI Mock Interviews

Real role-based simulations with unlimited practice anytime, structured to match actual MAANG interview journeys.

AI-Powered Resume Builder

ATS-ready resumes powered by 100K+ real profiles; Scaler learners historically have seen 5× more interview calls.

Taught by Industry Leaders

Learn from on job the - top professionals, not career teachers. practical insights rated highly by 50k+ learners

SCALER ADVANTAGE

Live Classes with Recording

Interactive live sessions with instant recordings & notes for revision.

Expert Mentor Guidance

1:1 personalized advice from top-firm mentors mapped to your profile and career goals.

Monthly Contests

Module-specific tests tied to job readiness, with unlimited attempts for improvement.

Skill Certifications

Rigorous module-level certifications that prove job-ready skills recruiters trust.

Coding Streak

Daily practice streaks with rewards & streak freeze to help you stay consistent.

Extend into Master's Degree

Scaler credits convert into a globally recognized Master's via Woolf.

Get Certified. Get Reimbursed.

Industry-recognised certifications boost your credibility as a DevOps engineer, we don't just prepare you for them—we back you.

Clear the CKA or AWS DevOps certification, and Scaler will reimburse your exam fee.

That's up to $745 in value – fully reimbursed.

Build credibility, boost your resume, and land top DevOps roles.

COURSE OUTLINE

Our comprehensive structure underlines the importance of each module so that you have a clear understanding of the course.

Module	Duration (months)
Python	1
DSA 1	1
Linux Shell Scripting & Computer Systems - OS, CN, DBMS	2
DevOps Tools	3.5
AWS	3
Specialisation	
Cybersecurity	4
Electives	
Advanced DSA 1	1
Advanced DSA 2	1
Advanced DSA 3	1
System Design	2
MLOps/LLMOps/AIOps	2

Ex- amazon and SAMSUNG

KNOW YOUR MENTORS

Take your Learning to New Heights

Navigate your career path through personalised 1:1 mentorship. Get expert guidance, interview tips, placement support and assurance of being on the right track.

Vijay Hegde
DevOps Engineer
Walmart

Vijay is experienced in implementing top-notch DevOps methodologies and utilises various tools & technologies to drive automation for imapctful scenarios.

Shivansh Bajpai
DevOps Engineer-3
amazon

Shivansh led full-scale data transformation at Azure Databricks, using Python and SQL to process Avro files into data frames. He also addressed real-time QA/ PROD issues.

Rakesh Budde
SDE 1 - DevOps
CLOUDERA

Rakesh led the successful migration of Docker Compose services to Kubernetes, ensuring seamless deployments using Python, Django Rest & more.

Arnab Seal
Sr. DevOps Engineer
Inflection

Arnab Seal is driving the tranformation of Inflection.io's platform using tools like AWS, Terraform, Python, Github and more.

Onboarding Session

Course Introduction:

Start in a customised cohort and forge meaningful connections with people who will be your allies on this journey.

Choose your Mentor:

Select the right mentor for guidance and gain invaluable insights to boost your career.

Meet a Learning Coordinator:

Ensure seamless progress, support, and effective communication so you don't feel lost at any point in the course.

LIVE Learning

Learning in a live classroom always holds more value than a self-paced course.

Assignments & Homeworks

Develop your skills & deepen your understanding by applying the techniques learned in class.

Learn in a LIVE classroom

Engage with instructors and your peers in real time to get diverse perspectives and instant clarifications.

1:1 Mentor Guidance

From personalised mentorship to tailored support, our mentors will guide you through every doubt.

AI-assisted Problem-Solving Support

Get insightful reccomendations and solutions across a spectrum of challenges for improved efficiency and effectiveness.

Situational Problem & Soln

Aids you in developing critical thinking skills, enhancing your ability to analyse and resolve diverse problems.

1:1 Teaching Assistance

Live chat and video call to resolve individual queries & questions to avoid any hindrances in your academic growth.

LEARNING PEDAGOGY

Practice with Real-Life Case Studies via Code Sandbox

Get hands-on learning experience by solving 50+ real case studies that include data sets from top tech companies.

Objective:
Creating a Custom Docker Image

Scenario:

Under the **/home/user/student/assignment/** directory, two files would help you run a flask application. Your tasks are listed below:
TASK - 1:

Create a Dockerfile for a Python web application that requires **Python 3.8** and dependencies listed in the **requirements.txt** file. Ensure the working directory is set to `/app` and the application runs with the command `python app.py`.

TASK - 2:

Build the Docker image with the tag **my-python-app**.

TASK - 3:

Store all the build output to **/home/user/docker_build_output.txt** file.

As part of security best practices, your task involves setting up a user account for an audit team member. This user, named **audit_member**, should be limited to executing only the following commands with **sudo** privileges, which will be discussed in the task below. These commands are essential for the audit team to monitor the system and ensure security compliance without granting unrestricted access.

NOTE: When asked for password while using command like sudo, use user@123! as password.

TASK - 1: Create a New User

Create a new user called **audit_member,** ensuring they have a home directory.

TASK - 2: Configure Sudo Privileges

Allow **audit_member** sudo access exclusively for the specified commands.

1. Safely edit the **sudoers** file by executing **visudo**.
2. Specify the commands **audit_member** is allowed to execute as sudo without granting access to any additional commands.

DevOps Lab Stop Lab

Terminal 1 Stops in:

```
Enabling conf localized-error-pages.
Enabling conf other-vhosts-access-log.
Enabling conf security.
Enabling conf serve-cgi-bin.
Enabling site 000-default.
invoke-rc.d: policy-rc.d denied execution of start.
Created symlink /etc/systemd/system/multi-user.target.wants/apache2.service → /usr/lib/systemd/system/apache2.service.
/usr/sbin/policy-rc.d returned 101, not running 'start apache2.service'
Created symlink /etc/systemd/system/multi-user.target.wants/apache-htcacheclean.service → /usr/lib/systemd/system/apache-htcacheclean.se
ice.
/usr/sbin/policy-rc.d returned 101, not running 'start apache-htcacheclean.service'
Processing triggers for libc-bin (2.39-0ubuntu8.2) ...
user@0ef631f49dc7:~$
```

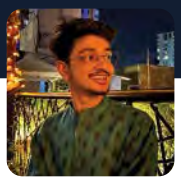
Give your Career the Boost it Deserves

With the right support and career guidance, your skills can add real impact to tech companies. We'll push your limits and prepare you like a soldier ready for war!

- Get exclusive job opportunities through our **1200+ partner network.**
- Optimise your resume, and LinkedIn profile to make them industry-ready. **Get full placement assistance.**
- **Practice mock interviews** with your mentors.
- **Connect and collaborate** with your peers to get unique perspectives.

Our Alumni are at reputed Tech Companies & promising Startups

What our Learners say about Scaler?



"Perhaps the biggestchallenge in my journey was to find the right place that would give structure to my learning. Scaler's course really helped in a way my college couldn't."

-Ishan Sa rma,
SDE-I, amazon

"Scaler's curriculum included all sorts of industry-relevant content, which was indeed what I needed at the time. I learned how to manage my time efficiently to maximise my results."

-Bha rath Veldi
DevOps Engineer, amazon

"I truly cherish my journey to Zetwerk, and I could not have accomplished it without Scaler's help. The curriculum is industry standard, which helps one prepare for real-life challenges."

-Abirami S, SDE-II, ZETWERK
